

## **Fire alarm inspector/tester technician**

**Requirements: Ma. Systems Technician License D or greater, basic computer skills**

**Position: Full time**

Easton Electronics, Inc.

Canton, Ma

[www.easton-electronics.com](http://www.easton-electronics.com)

Easton Electronics is currently seeking fire alarm technicians to join our rapidly growing **fire alarm inspection and testing team.**

You will be based out of your home location and are not required to drive to our office location daily.

This position includes:

- Take home company vehicle
- Advanced technician support tools: laptop, smartphone, cellular internet access, company designed software, online scheduling and dispatch, remote access support systems and much more
- Competitive compensation
- Health and dental insurance
- 9 paid holidays plus vacation

Easton Electronics is a leader in world-class service, testing and maintenance of fire alarm and fire sprinkler systems. Additionally we manufacture, supply and support the most advanced wireless reporting system available today to fire departments and similar organizations.

This position involves the testing and inspection of commercial fire alarm systems. Fire alarm experience, basic computer skills and a minimum of a Mass. D license are required. This position also includes being included in our after-hours on-call rotation. The on-call rotation is one week approximately every 5-6 weeks.

If you're a motivated individual with a great work ethic, a friendly, customer-orientated personality, and looking for an enjoyable and challenging work environment please provide us with your resume as we have the position you're looking for!
